General Information

The Roundtable is organized under the auspices of the Russian Foundation for Basic Research (RFBR) and the French National Centre of Scientific Research (NCSR) as an event of the EU – Russian Year of Science.

The event is aimed to analyze the mechanisms of support to scientific research by the different Russian and French institutional and operational partners more from an organizational and managerial point of view rather from a scientific one, to estimate their efficiency and effectiveness, and to produce eventual recommendations to foster and facilitate international scientific cooperation.

During the meeting, a series of short presentations (15') will be made by the scientists involved in the collaborative structures such as International Associated Laboratories (IAL) and International Research Networks (IRN). It is expected the participation of about 45 persons presenting 19 acting IALs and IRNs, as well as the representatives of CNRS and NCSR.

In addition to the formal presentations, researchers involved in international collaborations can send to the organization committee an abstract (2 pages max) describing their collaboration activities. Presentations and abstracts materials are expected to be distributed in a package after the event to all its participants.
